Professional Summary

Python Developer with a strong foundation in core Python concepts, problem-solving, and software development fundamentals. Skilled in writing clean, efficient, and maintainable code with knowledge of Object-Oriented Programming (OOP), Data Structures, Algorithms, and debugging techniques.

Also has knowledge of Flutter and Dart for cross-platform mobile application development, including UI design, widget management, navigation, and developing simple responsive applications.

Possesses basic knowledge of Artificial Intelligence and Machine Learning, including data handling and familiarity with libraries such as NumPy, Pandas, and Scikit-learn.

A quick learner with strong analytical and problem-solving skills, passionate about technology and software development. Eager to apply academic knowledge and self-learning experience to real-world projects while continuously improving technical skills and growing as a Python and Flutter Developer.

Education

Master of science in computer Application and Information Technology,

2025 – Present

Smt. C. K. Patel M.Sc. (CA & IT) College. (HNGU University)

Kadi, Gujarat

Bachelor of Science in Computer Applications & Information Technology,

06/2022 – Present

Smt. C. K. Patel M.Sc. (CA & IT) College. (HNGU University)

kadi, Gujarat

Skills

Programming

Flutter, Python, HTML, CSS, AI/ ML

Database

MySQL, phpMyAdmin

Tools

GitHub

Soft Skills

Team work, Communication, Problem Solving, Quick learner and adaptive to new technologies

Projects

Lost & Found Management System

- Developed a Lost & Found web application using Python and Flask framework.
- Implemented user authentication system with Login and Signup functionality.
- Designed forms to allow users to submit lost and found items.
- Stored user and item details securely using SQLite database.
- Created an Admin Panel to manage and monitor reported items.
- Designed a simple and user-friendly interface using HTML and CSS.

Tech Stack: Python, Flask, SQLite, HTML, CSS

Hospital Management System

- Developed a web-based Hospital Management System using Python and Flask.
- Implemented user authentication with secure Login and Signup functionality.
- Created an appointment booking system for patients and appointment management features.
- Developed an Admin Panel to manage users, appointments, and hospital records.
- Integrated SQLite database for efficient data storage and retrieval.

- Designed a responsive and user-friendly interface using HTML and CSS.

Tech Stack: Python, Flask, SQLite, HTML, CSS

BMI Calculator Mobile Application

- Developed a BMI (Body Mass Index) Calculator using Flutter and Dart.
- Created a responsive and user-friendly interface for entering weight and height details.
- Implemented BMI calculation logic and displayed results based on user input.
- Used Flutter widgets and form validation to ensure accurate data entry.
- Designed a clean and attractive UI following Material Design principles.

Tech Stack: Flutter, Dart

Languages

- English
- Gujarati
- Hindi
